Subject: AltEn Lagoon Information

Northwest Cell: Dimensions 579' x 960' (12.5 max water surface area)
Northeast Cell: Dimensions 630' x 768' (11.0 max water surface area)
Southeast Cell: Dimensions 630' x 768' (11.0 max water surface area)

Design freeboard for Northwest Cell: 2.1 feet
Design freeboard for Northeast Cell: 3.0 feet
Design freeboard for Southeast Cell: 3.0 feet

I've attached the plans and specifications for the newest addition (Northwest Cell). This also includes one set of data for the raw influent wastewater:

BOD: 2,600 mg/L

TKN: 2,410 mg/L

Ammonia: 1,120 mg/L

TSS: 1,340 mg/L

Phosphorus: 1,380 mg/L

I've also included the stage-storage tables. These make calculating the volume that needs to be removed to get to freeboard very simple. I think Mark got updated photos of the lagoon levels yesterday.

Thanks,

Hillary Stoll
